

The background is a dark, star-filled space. A bright, multi-pointed star is at the center, emitting a white glow. Swirling around this star are intricate, glowing lines of orange, red, and yellow, resembling energy or light trails. The overall effect is one of dynamic, cosmic energy.

Presence

Presence/Self – is the 'Come From'

- It informs the moment, the relationship, the nature of the interaction, the path of inquiry, the issue to be addressed
- The source that is sensed/known while living the daily moments of life.
- It is the ever present background of intelligent energy.

It has attributes such as:

- Unhookable
- Ease and grace
- A sense of knowing what, when, how, where and if
- Able to spontaneously respond to the needs of the moment with the fullness of one's being.

Self is typically experienced as either:

a. the ego; that which knows, remembers, desires, suffers, etc.

Or

b. the uniting principle, as a soul, underlying all subjective experience.

Ms What is Self?

The Self is the resident paradox of being uniquely generated and simultaneously in absolute connection with everything. It requires us to be able to work with both/and, instead of either/or.

And the fullest expression of unique self is the true gift of masterful evocation.

"Everybody is a genius. But, if you judge a fish by its ability to climb a tree, it will spend its whole life believing that it is stupid." *Albert Einstein*

In ancient Roman religion, the *genius* was the individual instance of a general divine nature that is present in every individual person, place, or thing.

Our genius emerges and our confidence grows
when we do what's most meaningful to us
